TARGET AUDIENCE
This activity is intended for medical oncologists, hematologists, hematology-oncology fellows and other healthcare providers involved in the treatment of hematologic cancers.

OVERVIEW OF ACTIVITY
The treatment of hematologic cancer remains a challenge for many healthcare professionals and patients despite recent gains made in the management of this group of diseases. Determining which treatment approach is most appropriate for a given patient requires careful consideration of patient-specific characteristics, physician expertise and available health system resources. To bridge the gap between research and patient care, this issue of Hematologic Oncology Update features one-on-one discussions with leading hematology-oncology investigators. By providing information on the latest clinical developments in the context of expert perspectives, this activity will assist medical oncologists, hematologists and hematology-oncology fellows with the formulation of evidence-based and current therapeutic strategies, which in turn facilitates optimal patient care.

LEARNING OBJECTIVES
• Incorporate new therapeutic strategies into the best-practice management of newly diagnosed and relapsed/refractory Hodgkin lymphoma.
• Reevaluate current treatment approaches for patients with myeloproliferative disorders and acute and chronic leukemias in light of newly emerging clinical data.
• Recognize the recent FDA approvals of daratumumab, elotuzumab, ixazomib and panobinostat, and identify where and how these agents should be integrated into the clinical management of relapsed or refractory multiple myeloma.
• Assess approved and investigational treatment options for patients with mantle-cell lymphoma.
• Appreciate the recent FDA approval of venetoclax as treatment for patients with relapsed/refractory chronic lymphocytic leukemia and deletion 17p, and discern how this therapy can be appropriately integrated into the clinical management of this disease.

CREDIT DESIGNATION STATEMENT
Research To Practice designates this enduring material for a maximum of 1.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

AMERICAN BOARD OF INTERNAL MEDICINE (ABIM) — MAINTENANCE OF CERTIFICATION (MOC)
Successful completion of this CME activity enables the participant to earn up to 1.5 MOC points in the American Board of Internal Medicine’s (ABIM) Maintenance of Certification (MOC) program. Participants will earn MOC points equivalent to the amount of CME credits claimed for the activity. It is the CME activity provider’s responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

Please note, this program has been specifically designed for the following ABIM specialty: medical oncology.

Personal information and data sharing: Research To Practice aggregates deidentified user data for program-use analysis, program development, activity planning and site improvement. We may provide aggregate and deidentified data to third parties, including commercial supporters. We do not share or sell personally identifiable information to any unaffiliated third parties or commercial supporters. Please see our privacy policy at ResearchToPractice.com/Privacy-Policy for more information.

HOW TO USE THIS CME ACTIVITY
This CME activity consists of a video component. To receive credit, the participant should watch the video, complete the Post-test with a score of 80% or better and fill out the Educational Assessment and Credit Form located at ResearchToPractice.com/HOU116/Video/CME.

CONTENT VALIDATION AND DISCLOSURES
Research To Practice (RTP) is committed to providing its participants with high-quality, unbiased and state-of-the-art education. We assess conflicts of interest with faculty, planners and managers of CME activities. Conflicts of interest are identified and resolved through a conflict of interest resolution process. In addition, all activity content is reviewed by both a member of the RTP scientific staff and an external, independent physician reviewer for fair balance, scientific objectivity of studies referenced and patient care recommendations.

ACCREDITATION STATEMENT
Research To Practice is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
FACULTY — The following faculty (and their spouses/partners) reported relevant conflicts of interest, which have been resolved through a conflict of interest resolution process:

**Anas Younes, MD**
Chief, Lymphoma Service
Memorial Sloan Kettering Cancer Center
New York, New York

**Contracted Research:** Curis Inc, Johnson & Johnson Pharmaceuticals, Novartis Pharmaceuticals Corporation; **Honoraria:** Incyte Corporation, Janssen Biotech Inc; **Other Remunerated Activities:** Bayer HealthCare Pharmaceuticals, Bristol-Myers Squibb Company, Celgene Corporation, Merck, Takeda Oncology.

**B Douglas Smith, MD**
Professor of Oncology
Division of Hematologic Malignancies
The Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins
Baltimore, Maryland

**Consulting Agreements:** Bristol-Myers Squibb Company, Celgene Corporation, Novartis Pharmaceuticals Corporation, Pfizer Inc.

**Rafael Fonseca, MD**
Getz Family Professor of Cancer
Chair, Department of Internal Medicine
Mayo Clinic Arizona
Scottsdale, Arizona

**Advisory Committee:** Applied Bioscience, Bristol-Myers Squibb Company; **Consulting Agreements:** Bayer HealthCare Pharmaceuticals, Bristol-Myers Squibb Company, Novartis Pharmaceuticals Corporation, Onyx Pharmaceuticals, an Amgen subsidiary, Pharmacyclics LLC, an AbbVie Company, Sanofi; **Contracted Research:** Amgen Inc, Celgene Corporation, Onyx Pharmaceuticals, an Amgen subsidiary, Sanofi.

**John P Leonard, MD**
Richard T Silver Distinguished Professor of Hematology and Medical Oncology
Associate Dean for Clinical Research
Weill Cornell Medical College
New York, New York

**Consulting Agreements:** Bayer HealthCare Pharmaceuticals, Celgene Corporation, Cephalon Inc.

RESEARCH TO PRACTICE STAFF AND EXTERNAL REVIEWERS — The scientific staff and reviewers for Research To Practice have no relevant conflicts of interest to disclose.

This educational activity contains discussion of published and/or investigational uses of agents that are not indicated by the Food and Drug Administration. Research To Practice does not recommend the use of any agent outside of the labeled indications. Please refer to the official prescribing information for each product for discussion of approved indications, contraindications and warnings. The opinions expressed are those of the presenters and are not to be construed as those of the publisher or grantors.

This activity is supported by educational grants from AbbVie Inc, Amgen Inc, Astellas Pharma Global Development Inc, Bayer HealthCare Pharmaceuticals, Bristol-Myers Squibb Company, Celgene Corporation, Genentech BioOncology, Incyte Corporation, Janssen Biotech Inc, Novartis Pharmaceuticals Corporation, Pharmacyclics LLC, an AbbVie Company, Seattle Genetics and Takeda Oncology.

**Hardware/Software Requirements:**
A high-speed Internet connection
A monitor set to 1280 x 1024 pixels or more
Internet Explorer 7 or later, Firefox 3.0 or later, Chrome, Safari 3.0 or later
Adobe Flash Player 10.2 plug-in or later
Adobe Acrobat Reader
(Optional) Sound card and speakers for audio

**Last review date:** August 2016
**Expiration date:** August 2017

Flinn IW et al. Safety and efficacy of a combination of venetoclax (GDC-0199/ABT-199) and obinutuzumab in patients with relapsed/refractory or previously untreated chronic lymphocytic leukemia — Results from a Phase 1b study (GP28331). Proc ASH 2015;Abstract 494.
